

Bob Frank Plumbing, Inc. Plumbing Protection Plan Benefits

We Give You:

Peace of Mind

Regularly scheduled visual inspections of your water heater and fixtures to keep them operating at peak, trouble-free efficiency. Potential problems are identified before they cause trouble, saving you the expense of major emergency repair bills.

Competent Experts

A highly trained, dependable staff of experts takes professional pride in the care and performance of your plumbing system.

Preferred Treatment

The Bob Frank Plumbing, Inc. Plumbing Protection Plan entitles you to prompt emergency service, preferential scheduling of preventative maintenance, and routine services. **Only Plumbing Protection Plan members are eligible for emergency service. Limitations may apply*.**

Tailored to Your Needs and Budget

Your Plumbing Protection Plan can be tailored to your personal needs. Do you have more than one property in the area or want more than one inspection a year? Call us today and we will customize a plan just for you!

Price Protection

You approve any work we recommend **BEFORE** we start. And because we charge by the job—not the hour—you save money too!

What We Will Do For You

Water Heater

- Inspect the burner assembly on your gas water heater
- Test elements, etc. on electric water heater
- Check your thermostat settings
- Visually check the temperature and pressure relief valves for safe operation

This gives you the peace of mind knowing that your water heater operates at peak efficiency, ensuring your safety and saving you money on your utility bills.

Faucets

- Check for leaks and corrosion
- Inspect aerator for proper flow
- Inspect handles for proper operation

This extends the life of the most widely used fixture in the house and because a leaky faucet can waste over 200 gallons of water a day, it will also save you money.

Toilets

- Dye test and inspect the toilets and tanks for leaks
- Check for proper flushing action
- Adjust water level and flapper

A leaking toilet can cost hundreds of dollars per year. Our service helps reduce water consumption, and reduces the chances of drain stoppages due to poor waste flow through the lines.

Emergency Shut Off Valves

- Inspect all emergency shut off valves for proper operations—this includes valves located at the main water line, underneath sinks, toilets, the washing machine and the cold water inlet to the water heater.

Additional Safety Checks

- Water pressure on incoming lines
- Washing machine hoses
- Gas Connectors
- Inspect Traps
- Water Supply Point of Entry
- And Much More... *

This is a visual inspection only. The technician will provide you a copy of the inspection and give you any recommendations for repairs.

All repair work will be quoted up front and no work will be performed without your permission.

* Residential plumbing includes sump pumps, well tanks, and water treatment systems.
